2014 Contribution of Nonresident Traveler Expenditures to Montana's Economy

- In 2014, nonresident visitors to Montana spent a projected \$3.98 billion in the state. (See Table 2 below)
- This \$3.98 billion in local spending directly supports \$3.26 billion¹ of economic activity in the state, and supports an additional \$1.86 billion²⁺³ of economic activity, indirectly.
- The projected total contribution of nonresident spending to Montana's economy was \$5.11 billion⁴ in 2014.

Direct impacts result from nonresident traveler purchases of goods and services; **Indirect impacts** result from purchases made by travel-related businesses; and **Induced impacts** result from purchases by those employed in travel-related occupations.

Industry Output is the value of goods & services produced by an industry which nonresidents purchase. **Employment** is full- and part-time average annual jobs. **Other Property Type Income** consists of payments for rents, royalties and dividends.

* **CHANGE:** The IMPLAN data set now incorporates state-level BEA TOPI (taxes on production and imports) data, rather than using U.S. data to produce state-level estimates, as was done in previous IMPLAN data sets. Comparison to years prior to 2012 is not advised.

⁵ Spending data are gathered via on-site surveys of nonresident travelers at airports, gas stations, and rest areas in MT. Travelers report 24 hours worth of trip expenditures representing the day during which they were intercepted by an ITRR surveyor.

⁶ Data are collected quarterly. Therefore, avg. daily expenditures are weighted averages of quarterly figures. ⁷ Expenditures may appear lower than typical costs in these categories because they are averaged across all visitor groups. ⁸ Expenditure category totals may not add to year total due to rounding.
